

REEVES MOTO DRIVE BELTS

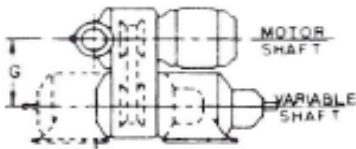

SIZES 100 - 600K

Some belt selections where noted (horizontal or vertical) will require that Motodrive assembly be known. That information can be determined visually or by locating Motodrive assembly number on nameplate and referring to Master Catalog Reeves Section.

Table may be used for all C-flow assemblies. When selecting belt for Z-flow assemblies always use belt with the shortest "G" dimension listed for applicable Motodrive size.

"Z"-flow assemblies can be identified by an "A" following assembly number on Motodrive nameplate (ex. 105-A). All assemblies without the "A" are C-flow.

"G" dimension listed in table is a dimension sheet reference and is the distance from center of control cover to center of variable shaft bearing plate on opposite end of the drive (driving & driven ends of the Motodrive).

Motodrive Basic Size	Motodrive Size	"G" Dimension	Assembly Position	Belt Part Number
050	All	6-1/2"	All	60503629A
